**BIO-CELLULAR TREATMENTS ARE NOW AS CLOSE AS YOUR DOCTOR'S OFFICE WITH
HEALEON MEDICAL'S POINT-OF-CARE SYSTEMS**

Healeon Medical, Inc. is paving the way for a broad array of regenerative solutions, which up until now, were not readily available in your physician's office. Healeon Medical does this by providing innovative medical devices, clinical expertise and support for autologous point-of-care treatments, which are typically not found available in a clinical setting, to physicians and surgeons across the country. They are able to do this by leveraging its years of experience in the medical device and surgical fields to develop a product mix designed to meet the demands set forth by physicians who want to be able to perform these procedures in a clinical setting at their point-of-care. What does this mean for the patient? No longer having to go outside the country to obtain these procedures; patients are able to receive regenerative treatments and therapies with confidence in their physician's office or clinic.

Healeon's flagship product, the CENTRIcyte™ 1000, makes point-of-care regenerative processes a reality. This new, state-of-the-art, all-in-one isolation device simplifies the isolation of cells from all tissue sources using a semi-automatic method. This eliminates the need for laboratory personnel, and allows for simple, consistent and reproducible results. It allows clinicians to maximize cell counts and viability from the smallest of samples at the point-of-care. The CENTRIcyte™ 1000's proprietary specimen kits allow for easy transferring of specimens through a closed system, which minimizes the chance of cross contamination and reduction of cell viability due to environmental influences. The CENTRIcyte™ 1000 will meet any clinician's adipose, bone marrow and peripheral blood processing needs. Your physician and their staff will be able to perform the tissue and cell extraction, processing and therapeutic treatments, without the need to send out samples for processing or bring in additional staff.

Dr. John Laura says, "Having the ability to perform the cell isolation and perform the treatments right in my own clinic is not only a benefit for us to control costs and save time, but it allows my patients to receive their treatments from me and my staff, without having to travel outside the US or to another facility. This gives my patients the peace of mind of being in a familiar setting; and allows us to administer their treatments easily and safely. Healeon has made this possible with their CENTRIcyte™ 1000 device. My staff loves the ease of use, and my patients love that the procedure takes only 2-3 hrs."

Dr. Laura continues, "Healeon has been instrumental in keeping my Regenerative Medicine/Cosmetic practice a leader in the field. Healeon always keeps us informed about emerging technology. They are quick to respond whenever there are questions or concerns, and they take a personal interest in the success of their clients."

About Healeon Medical, Inc.

Healeon Medical, Inc. (HMI) is a CA based corporation dedicated to paving the way for regenerative solutions by providing innovative medical devices, clinical expertise and support for autologous, point-of-care treatments. HMI has quickly become the industry leader in the emerging field of regenerative medicine. The management team is seasoned with over 70 years of medical device and therapy experience and has, in a short period of time, established HMI's CENTRIcyte 1000™ as the system of choice for informed clinicians.
